

Oct 2024

R Shiny Masterclass Series - Introduction

Host and deploy your Shiny application with
[Shinyapps.io](https://shinyapps.io)

EPI-interactive

Agenda

- **Session 1** | 30 September | Getting started with Posit Cloud and your first R Shiny app
- **Session 2** | 01 October | R Shiny core concepts and mobile ready layout
- **Session 3** | 03 October | R Shiny user interface components, reactivity and debugging
- **Session 4** | 07 October | Data sources and data processing in R Shiny
- **Session 5** | 08 October | Maps and spatial visualisation with Leaflet: adding map layers, annotations, pins, filters and legend
- **Session 6** | 10 October | Interactive charts with Plotly: chart types, customising hover boxes and chart styling
- **Session 7** | 14 October | Publishing R Shiny apps, design considerations and case study
- **Session 8** | 15 October | Case study, top 10 tips for data visualisation with R Shiny and wrap-up

Today

Designing your Shiny app

Publishing your Shiny app

Extended Exercise & practice

Designing your Shiny app

Design principles

- Colour scheme
- Accessibility
- Font
- Icons
- White space

Colour scheme

A consistent colour scheme brings a theme together

Limit your colour palette

Think about what colours you use where:

- Neutral - background colour, text elements
- Primary - foreground colours, navigation elements
- Bright - colours for points of interest

Colour scheme

Alcohol attitudes

Support for changes to help reduce problems associated with alcohol use.

Prevalence for selected subtopic

This table gives the percentage of the population affected (that is, the unadjusted prevalence in the specified population). Click on an indicator to find out more about it.

Show:

Total ▼

Indicator	Year (%) ⓘ				
	2010	2012	2014	2016	2018
Reduce the hours alcohol can be sold in my community	65.9	58.8	60.8	56.1	-
Increase restrictions on advertising/promotion seen or heard by under 18s	82.0	78.9	77.9	78.6	-
Ban alcohol-related sponsorship of events that people under 18 may attend	58.4	73.9	63.3	67.2	-
Too many local places to buy alcohol	-	39.4	34.8	31.3	-

Source: Health and Lifestyles Survey

Notes:

- Dashes indicate the data is not available.
 - For Total response this is due to the question/s not being asked in that survey wave.
 - For specific ethnicity totals, it may be due to the question not being asked or due to small sample size.

Kupe data explorer

Kia ora! Welcome to Kupe your data explorer provided by Te Hīringa Hauora, the Health Promotion Agency (HPA).

Kupe lets you explore Health and Lifestyles Survey data about New Zealanders' views and experiences across several topics.

The name, Kupe, is inspired by the chiefly Polynesian navigator and fisherman who, according to Māori oral tradition, discovered the islands of Aotearoa, New Zealand. After some difficulty catching fish off the coast of his homeland in Hawaiki, Kupe learnt of a giant whēke (octopus) eating the bait from his fishing hooks. Kupe set out to capture the troublesome octopus which led to a great pursuit across the Pacific Ocean, bringing Kupe and his followers to Aotearoa, New Zealand.

Alcohol

New Zealanders' level of support for changes to help reduce alcohol-related problems, current consumption, and responses about cutting back how much they drink.

Eating

The number of days in a week the main meal was prepared at home or bought from outside of home and how often households eat their main meal together.

Gambling

New Zealanders' views and experiences of gambling including participation, frequency of participation, harm, attitudes to harm, and gaming machines / pokies.

Māori cultural identity

How important it is for Māori New Zealanders to be involved in things to do with Māori culture, and their ability to speak Māori in day-to-day conversations.

Mental health and wellbeing

Results about feelings of isolation, mental illness diagnosis, experience with discrimination related to mental illness, and strength of connection to culture.

Sun exposure

Number of times that New Zealanders got sunburnt during the previous spring and summer, protective behaviours to prevent sunburn, and skin checks for early detection of skin cancer.

Web design mimics real life

Wrap-up design principles

- Choose a limited, well thought out colour palette
- Always consider accessibility in the design
- Pick the right font styles for your website
- Use icons to show and not tell
- Take inspiration from real life

R Shiny Publishing

Posit Cloud vs publishing

Posit Cloud

- Development environment*
- Others need to run the application from the code
- Testing
- Audience: analysts, data scientists, developers

Publishing

- Production environment
- Code is not accessible
- Audience: stakeholders, decision makers, end users

Hosting considerations

- Number of users
- Authentication and authentication
- Self or cloud hosting
- Performance
- Scalability
- Support
- Security
- Price

Cloud Hosting: shinyapps.io

Free

- 5 applications
- 25 active hours
- Community support

Paid

- 25+ applications
- 100+ active hours
- Premium email support
- Authentication
- Performance boost
- Custom domains

FREE

\$0 /month

New to Shiny? Deploy your applications for FREE.

Cloud hosting: Posit connect cloud

- Public version of Posit Connect enterprise platform
- Announced [July 2024](#) – currently in Alpha release
- Limited to deploying code from public GitHub accounts
- Cross platform
- Actively under development

Cloud Hosting: Open Source

Shiny server (Free)

- Linux only
- Fast deployment
- No limits with active hours
- Requires installation of packages (no limits)

Shiny proxy

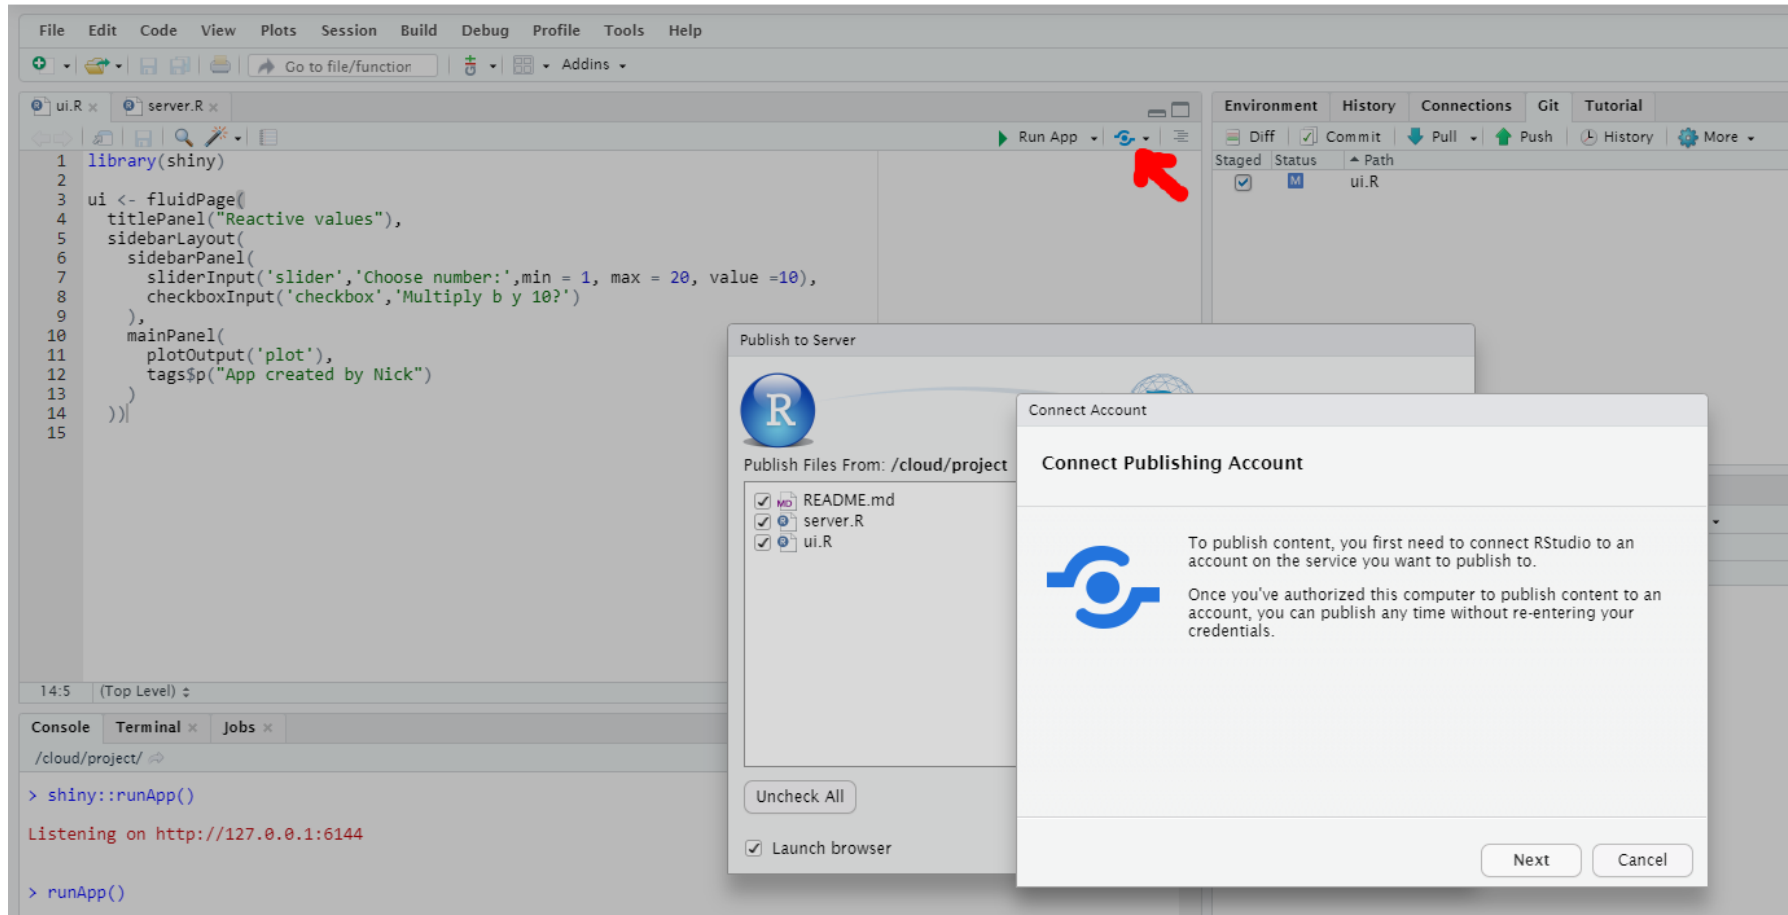

- For enterprise context (e.g. LDAP authentication)
- Based on Docker containers
- Can deploy other applications as well (e.g. Python Dash)
- Scalable – starts new app instance for each new user

Cloud Hosting: Commercial

- Commercial License (not AGPL)
- Posit Support
- Push-button publishing from RStudio IDE
- Scheduled updates and distribution of reports
- Self-managed content - see and manage what you've published or can access from others
- Professional Drivers

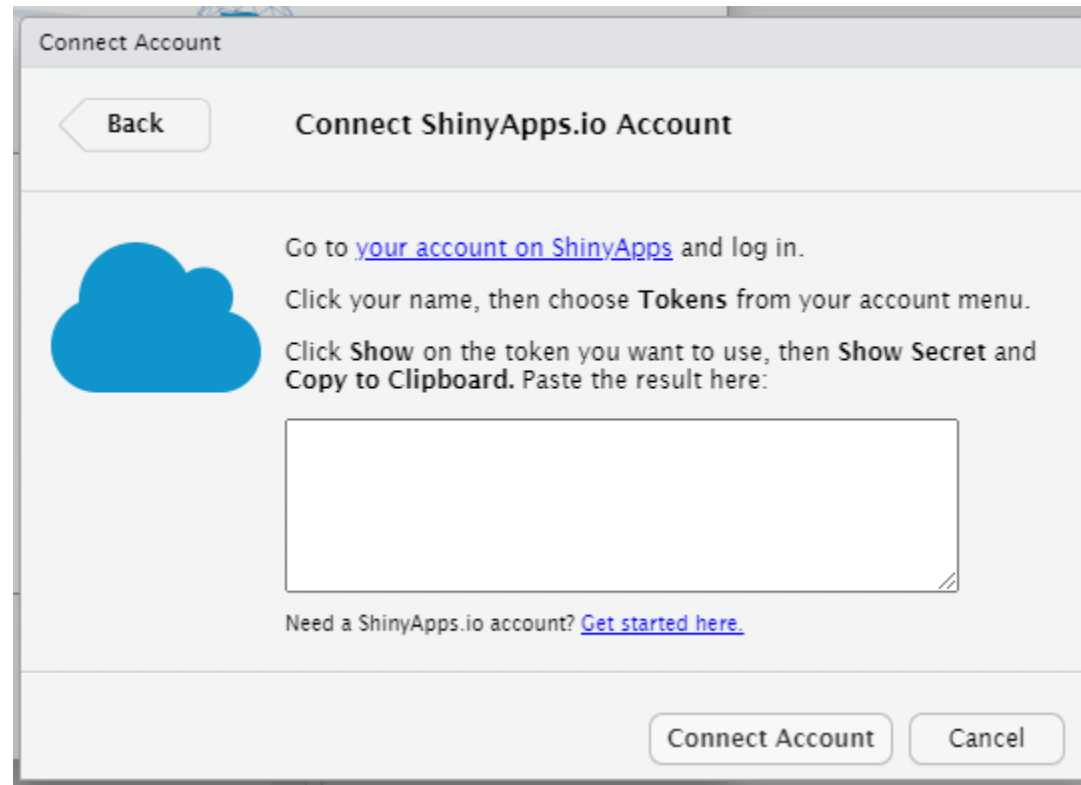

Demo: shinyapps.io

Publishing a Shiny application

Follow the prompted instructions to publish your application

The screenshot shows a 'Connect Account' dialog box with a light gray background. At the top left is a 'Back' button. The title 'Connect ShinyApps.io Account' is centered. On the left side is a blue cloud icon. The main text area contains instructions: 'Go to [your account on ShinyApps](#) and log in.', 'Click your name, then choose **Tokens** from your account menu.', and 'Click **Show** on the token you want to use, then **Show Secret** and **Copy to Clipboard**. Paste the result here:'. Below this is a large empty text input field. At the bottom left, it says 'Need a ShinyApps.io account? [Get started here.](#)'. At the bottom right are two buttons: 'Connect Account' and 'Cancel'.

Connect Account

Back

Connect ShinyApps.io Account

Go to [your account on ShinyApps](#) and log in.

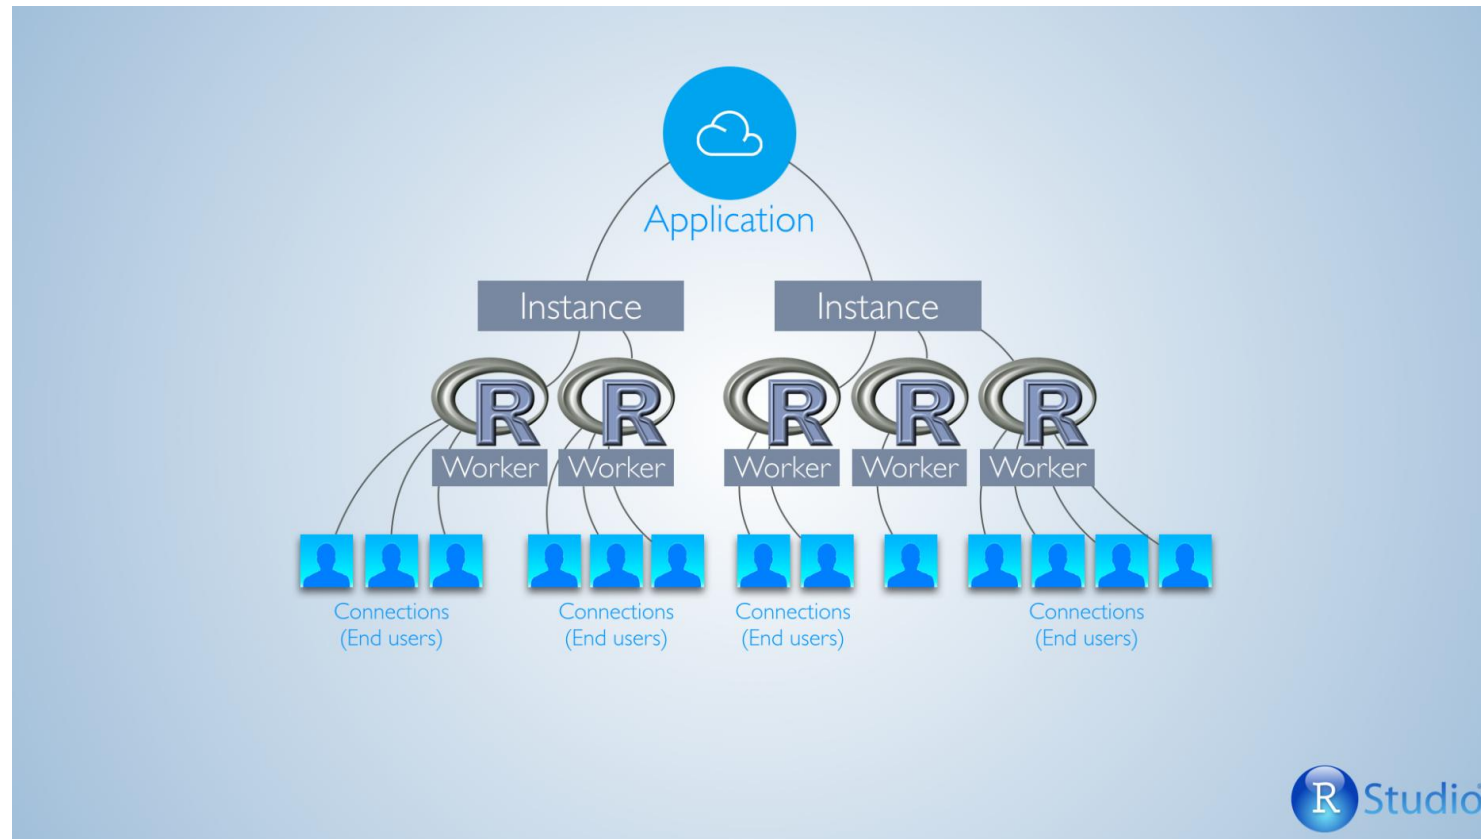

Click your name, then choose **Tokens** from your account menu.

Click **Show** on the token you want to use, then **Show Secret** and **Copy to Clipboard**. Paste the result here:

Need a ShinyApps.io account? [Get started here.](#)

Connect Account Cancel

Shinyapps.io – Scaling and Performance

Shinyapps.io – Scaling and Performance Settings

App settings:

- Connection Timeout – time after an idle app is stopped (default: 15 min)

Multiple users:

- R is single-threaded
- More worker processes can be added to serve multiple users at the same time
- Application instances are virtualised servers to serve the app (restricted by plan, up to 10 allowed)

Shinyapps.io – Trouble shooting

- Instance Load Factor
- Worker Load Factor
- Max worker processes
- Max # of concurrent connections supported per worker

Software as a living organism

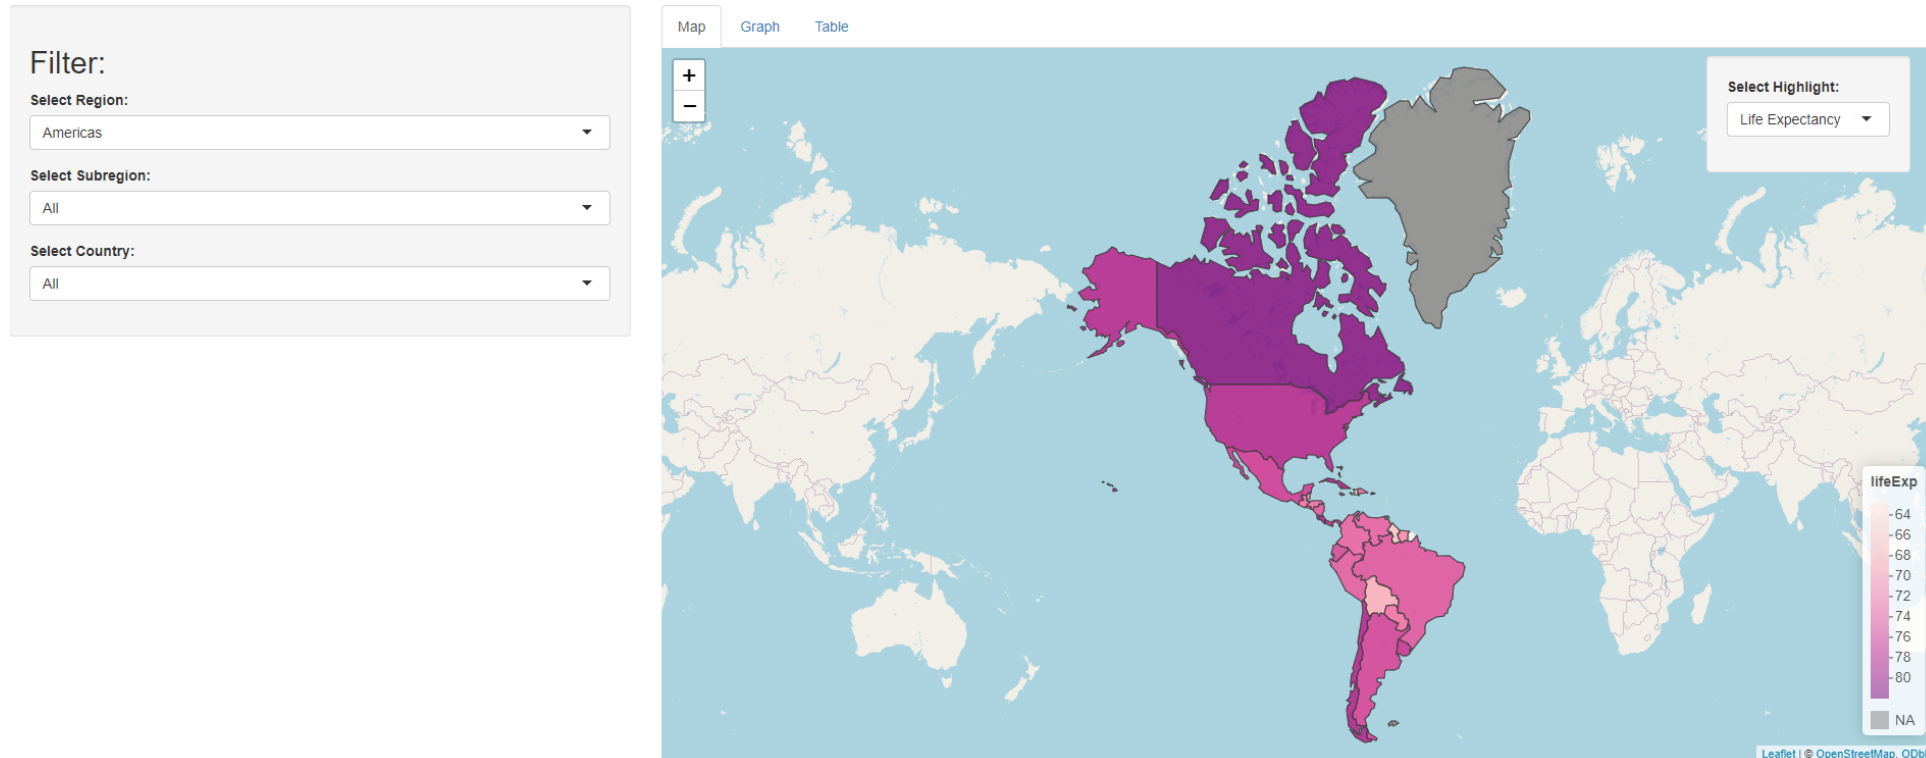

<http://www.ferhatgokce.com/wp-content/uploads/2019/05/Kolezyum-Bilet-T%C3%BCrleri.jpg>

Extended Exercise

Extended Exercise

- Let's try to combine everything we have learned so far!

To do:

In *stage 1*:

- Create a tabsetPanel with three tabPanels for a map, graph, and table
- Create a filter that filters by region, subregion, and country
- Add a map which will have the filtered countries highlighted (including a legend)

Optional: Add conditionalPanels to these filters to only display the next filter if the previous one is not "All"

Filter:

Select Region:

Africa ▼

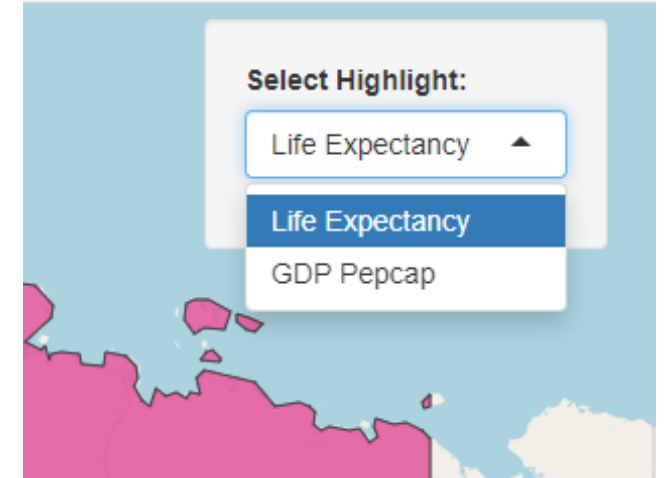

Select Subregion:

All ▼

To do:

Continuing from the last exercise or starting at *stage2*:

- Add a selectInput to the map to choose whether to highlight the map based on Life Expectancy or GDP Percap. Reflect these changes in the map highlights and legend.
- Add a graph to the graph tabPanel to display subregion (x) and lifeExp/gdpPercap (y).

To do:

Filter:

Select Region:

Africa

Select Subregion:

All

To do:

Continuing from the last exercise or starting at [stage3](#):

- Create a second plot in the Graph tabPanel to show the alcohol consumption over time for the filtered countries.
- Create a table in Table tabsetPanel which provides the shows the filtered data. (Make sure to rename the column names to something appropriate)

Map Graph **Table**

Show 10 entries Search:

Region	Subregion	Country	Life Expectancy	GDP Per cap
Africa	Eastern Africa	Tanzania	64.163	2402.09940362843
Africa	Northern Africa	Western Sahara		
Africa	Middle Africa	Democratic Republic of the Congo	58.782	785.347340663008
Africa	Eastern Africa	Somalia	55.467	
Africa	Eastern Africa	Kenya	66.242	2753.23613475312
Africa	Northern Africa	Sudan	64.002	4188.33481399507
Africa	Middle Africa	Chad	52.204	2076.65000798778
Africa	Southern Africa	South Africa	60.993	12389.7146679241
Africa	Southern Africa	Lesotho	53.268	2677.19807805197
Africa	Eastern Africa	Zimbabwe	59.36	1925.138698418

Showing 1 to 10 of 51 entries Previous 1 2 3 4 5 6 Next

Optional: There is an error one of the alcohol consumption data points (Libya) how can you remove/correct this?

Optional:

- Add a download button to the Table panel to download the filtered data as a csv.
- Add/change the map hovers.

Next time

- Case Study
- Top 10 Data visualisation tips
- Q and A
- Wrap up

Challenge:

Complete the extended exercise, publish your work on shinyapps.io or share your work with us on the session 7 forum!
